OPERATIONS

INTERNATIONAL PROJECT EXECUTION

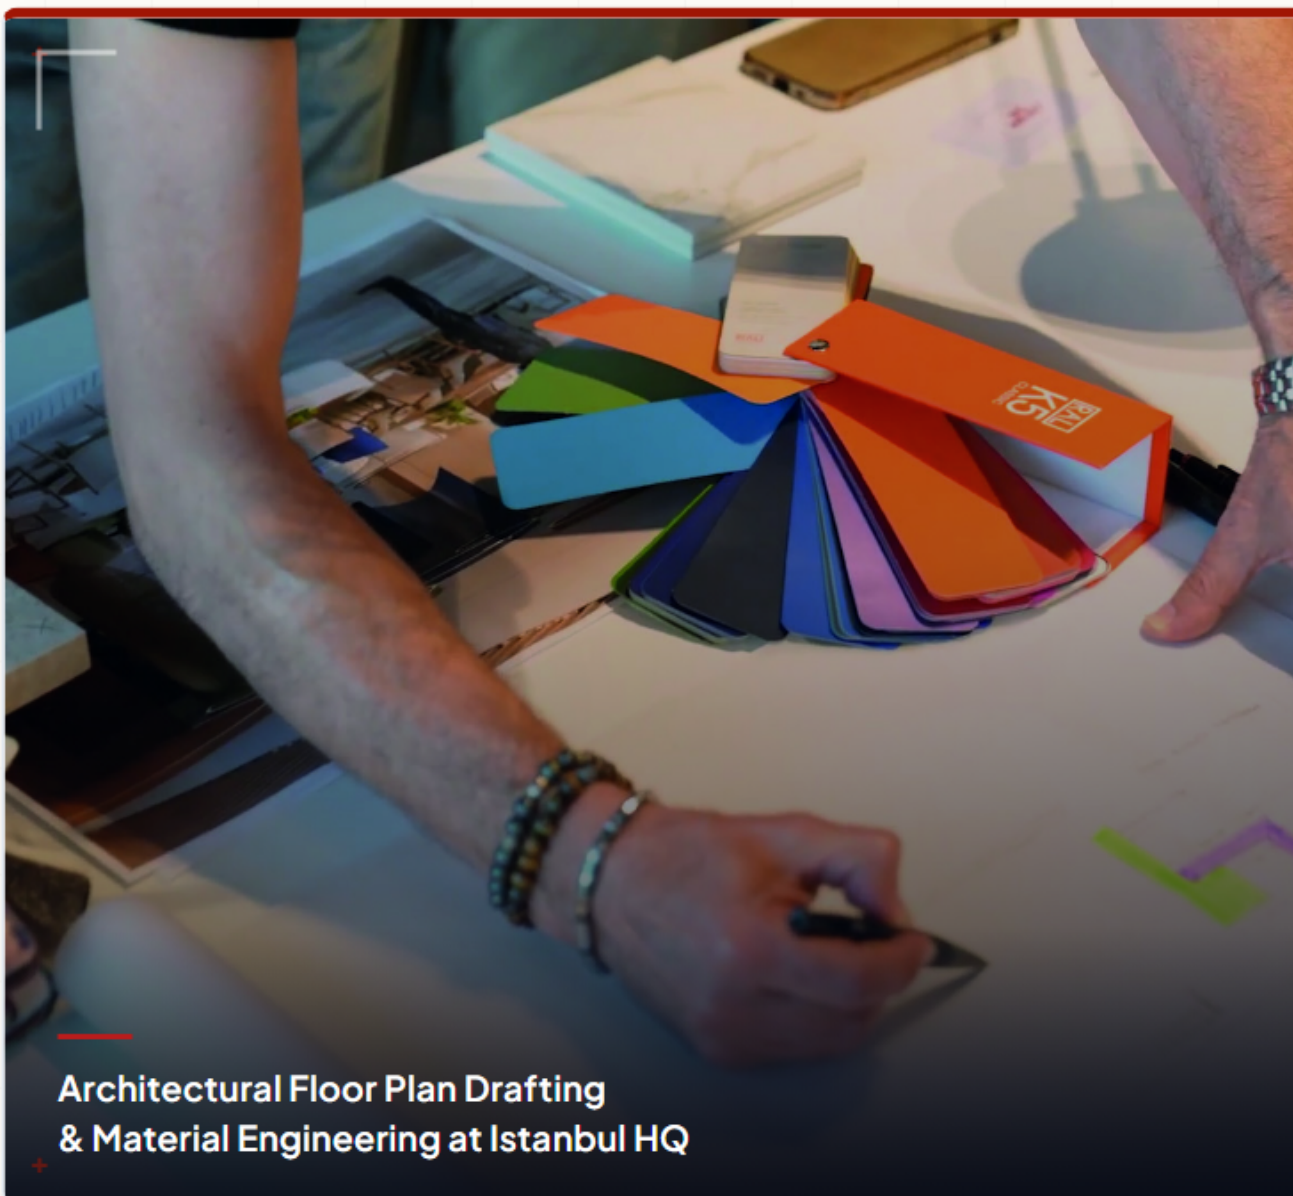

01 / CAPABILITIES

 SPEC: EPC-EXECUTION // REV 2024

Turnkey Engineering & Project Management Protocol

A structured lifecycle framework bridging computational feasibility, statutory underwriting, international procurement, and turnkey execution across sovereign delivery nodes.

Architectural Floor Plan Drafting
& Material Engineering at Istanbul HQ

 **TURKISH LEGAL CODE** // **FIDIC COMPLIANT**

B95 PROJE • ISTANBUL

Planning, Engineering Consultancy & Statutory Regulation

We conduct comprehensive engineering feasibility, architectural representations, facade schematics, and structural designs tailored to client objectives. All commercial contracts, guarantee agreements, and procurement instruments are legally regulated by company counsel under Turkish law.

 **STATUTORY LAW**

Legal Regulation

Regulated by Company Lawyer

 **MULTIDISCIPLINARY**

6 Core Disciplines

Civil, Arch, MEP, Urban, Medical, IT

 **TURNKEY EPC**

Single-Point Delivery

Factory Auditing to Commissioning

01

02

03

04

CONSULTANCY

Planning & Engineering Consultancy

Comprehensive project feasibility, architectural representations of floor plans and facades, and tailored structural engineering optimizing efficiency and cost.

BOQ & QUANTIFICATION

Define List of Needs & BOQ

Rigorous quantification of materials and project supplies aligning with client budgets, securing optimal pricing, verified warranties, and technical specification compliance.

TURKISH LAW

Organizing Documents Legally

Commercial contracts, initial invoices, guarantee agreements, and payment receipts legally regulated by the company lawyer under the provisions of Turkish law.

PROCUREMENT

Purchasing Management

End-to-end procurement governance: selecting vetted suppliers, sourcing prestigious European and Turkish brands, and issuing granular progress tracking reports.

05

FACTORY AUDITING

Inspection Production Process

Verification and validation manufacturing follow-up, conducting in-person factory visits to ensure strict compliance with technical specifications and production timelines.

06

MULTIMODAL FREIGHT

Logistics Operations

Coordinating delivery, customs clearance, bonded warehousing, and multimodal shipping (air, sea, overland) under customized logistics management programs.

07

TURNKEY FINISHING

Implementation & Finishing

Full-scope civil structural works, MEP electrical and plumbing installation, acoustic ceiling/wall treatments, antibacterial flooring, furnishings, and architectural fit-out.

08

AFTER-SALES SLA

After-Sales Services

Post-delivery project stewardship: multi-year maintenance service level agreements, as-built CAD documentation handover, and operator personnel training.

Together, we build a legacy of achievement and innovation

02 / PORTFOLIO

Regional Project References & Operational Footprint

Documented physical commissioning across 5 sovereign jurisdictions, establishing single-point general contracting leadership and international engineering pedigree.

01 CLIENT: AL-EMAD AL-ATHMAL / MIN. OF YOUTH & SPORTS

Artificial Lighting Units for Sports Stadium Turf

Turnkey engineering, mobile lightweight aluminum truss fabrication, and 9-unit European Philips LED photosynthetic systems deployed at Al-Shaab International Stadium.

GANTRY SPAN

12.0m Marine Aluminum

SURFACE IMPACT

OPTICAL SYSTEM

9x Philips Horticultural LEDs

EXECUTION

03 CLIENT: BASRA AIRPORT / MINISTRY OF TRANSPORT

International Basra Airport Renovation Project

Multi-phase architectural rehabilitation and MEP modernization of the main passenger terminal, adhering to strict international ICAO standards during 24/7 active operations.

CIVIL SCOPE

Passenger Terminal Modernization

SECURITY / CONVEY

GOVERNANCE

ICAO Aviation Standards

DELIVERY

Safwan Border, Iraq

02 HIGHWAY INFRA Dual-Mast Highway Lighting Infrastructure

Installation and electrical grid energization of continuous high-output illumination along the strategic Kuwait-Iraq arterial trade highway.

⚡ 48.5 km Continuous Illumination

Istanbul, Türkiye

04 COMMERCIAL EXPO 46th Turkeybuild Exhibition Pavilion

Modular structural steel pavilion construction, executive brand presence, and turnkey display architecture staged for 50,000+ trade delegates.

🌐 490+ Global Exhibitors Staged

Manama, Bahrain

05 DIPLOMATIC PLENARY 33rd Arab Summit Royal Conference Hall

Royal protocol interior fit-out, acoustic timber cladding, and sovereign executive plenary seating delivered via expedited air freight corridor.

✈ Expedited Air Freight Fit-Out

Benghazi, Libya

06 HEALTHCARE Akam Al-Sonwan Specialty Hospital Fit-Out

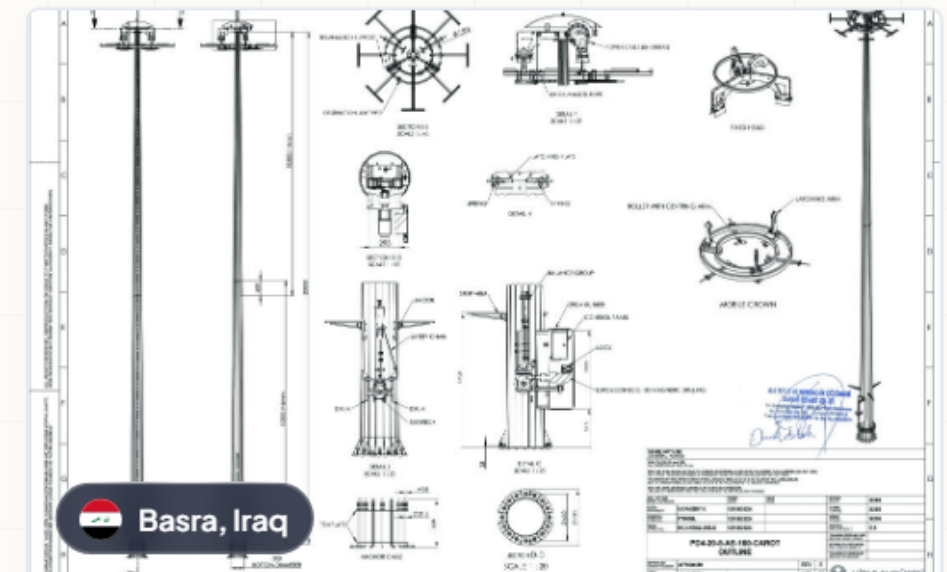

Turnkey clinical fit-out, medical-grade antibacterial flooring, sanitary cleanrooms, and medical gas

Idlib, Syria

07 RESIDENTIAL 2000 Sustainable Housing Units & Utilities

Modular rapid-assembly residential block erection, internal road paving, municipal sewage networks, and schools serving 10,000+ returning residents.

Basra, Iraq

08 "I" MUNICIPAL INFRA Sports City Roadway High-Mast Illumination

Structural fabrication, heavy foundation concrete casting, and electrical sub-station grid energization

pipeline installation delivered via sea logistics.

 Turnkey Cleanrooms & MEP

 2,000 Families Housed + Utilities

for 96 custom high-mast luminaires.

 96 Dedicated High-Mast Units

Together, we build a legacy of achievement and innovation

Artificial Turf Photosynthesis Lighting Units

Al-Shaab International Stadium • Baghdad, Republic of Iraq

COMMISSIONING CLIENT
Al-Emad Al-Athmal Co.

OFFICIAL SOVEREIGN COMMENDATION
Iraqi Ministry of Youth & Sports

DEPLOYMENT MILESTONE

First High-Output Photosynthetic System Deployed in Iraq

AL-SHAAB & KARBALA INTERNATIONAL STADIUMS // FIRST OF ITS KIND IN IRAQ

THE ENGINEERING CHALLENGE & TURNKEY SOLUTION

The executive management of **Al-Emad Al-Athmal Company** visited the headquarters of **B95 Project Company** in Istanbul to commission custom artificial lighting units for sports stadium turf—marking the first engineering project of its kind in Iraq.

Natural stadium pitch turf requires intense, ground-level photosynthetic radiation during winter months and in deeply shaded zones under grandstand cantilever roofs where natural sunlight is insufficient. B95 Project engineered mobile gantry units that supply balanced Photosynthetically Active Radiation (PAR) directly to the grass blades.

Engineered exclusively with lightweight marine-grade aluminum trusses to eliminate ground compaction, each 12-meter unit is powered by 9 European-origin **PHILIPS LED** luminaires. The turnkey delivery and operational performance was officially praised by the **Iraqi Ministry of Youth and Sports**.

12.0m

Ultra-Lightweight Marine Aluminum Gantry

Engineered aluminum structure designed to span 12 meters, minimize chassis weight, and prevent physical damage or root shearing to natural turf.

9x LEDs

European-Origin PHILIPS Horticultural LEDs

High-output specialized optoelectronics acting as a complete substitute for natural sunlight during winter and in covered shade areas.

0%

Turf Compaction High-Flotation Tires

Mobile running gear engineered to maneuver smoothly across premier match turf without surface depression or structural rutting.

100%

Turnkey EPC & Ministerial Commendation

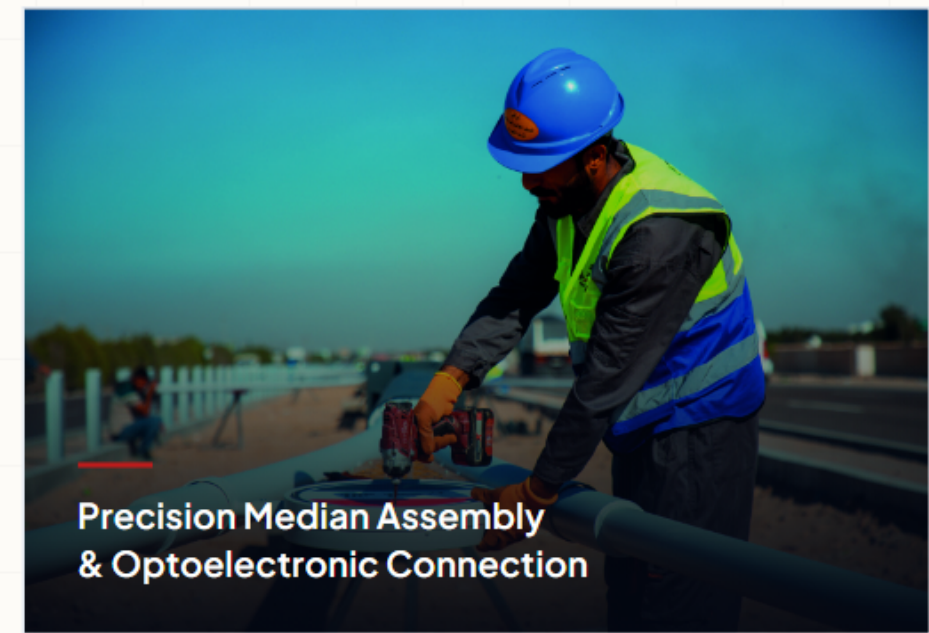

End-to-end engineering, factory assembly in Istanbul, cross-border freight, and on-pitch commissioning formally lauded by Iraqi Ministry of Youth & Sports.

**B95 Field Engineers in Branded Vests
at Stadium Pitch**

**Plant Quality Auditing
& Structural Steel Verification**

**Precision Median Assembly
& Optoelectronic Connection**

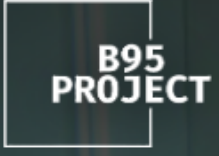

Together, we build a legacy of achievement and innovation
